

# LC-202 PIR Motion Detector with Glass-break and Shock sensor

## Key Features

- Analog PIR with digital processing
- Compatible with any hardwired control panel
- Case tamper
- White light protection and high RFI immunity
- Microphone and PIR sensitivity adjustment

The new LC-2xx line of hardwired detectors represents the ultimate choice for residential and industrial security installations.

LC-202 is a dual technology detector consisting of a PIR sensor and acoustic sensor able to detect glass breakage and shock.

The detector offers full flexibility, featuring 4 different operation modes, settable by built-in DIP switches. The desired operation mode can be set based on the environment the detector is installed in.

## Specifications

|                          |  |
|--------------------------|--|
| PIR range                | 12 meters                                    |
| Acoustic sensor range    | 7 meters                                     |
| Field of view            | 90 degrees                                   |
| LED color                | Red  |
| Walk test                | Yes  |
| Case tamper              | Yes  |
| Creep zone               | Yes  |
| Pulse counter            | Yes  |
| RFI protection           | 30 V/m                                       |
| Temperature compensation | Yes  |
| Mounting                 | Direct on the wall or with bracket (LC-L2ST) |
| Power supply             | 13.8 Vdc                                     |
| Current draw             | 19 mA  |
| Dimensions               | 110 x 60 x 46 mm                             |

## Approvals

- CE, EN Grade 2

## Johnson Controls

Johnson Controls is a global diversified technology and multi-industrial leader serving a wide range of customers in more than 150 countries. Our 120,000 employees create intelligent buildings, efficient energy solutions, integrated infrastructure and next generation transportation systems that work seamlessly together to deliver on the promise of smart cities and communities. Our commitment to sustainability dates back to our roots in 1885, with the invention of the first electric room thermostat.
